

APPLICATION PROGRAM INFORMATION

Dry Contact 24CH Sensor

M/S24.1

KNX/EIB-BUS

Document Version: 1.0, Date: _____

This document describes the M/S24.1-functions with the KNX-product- application: _____

Compiled by (english name): _____ Mr. He

HDL-Position: _____ Technical Manager, KNX-Products

Location: _____ Gungzhou _____ Date: _____ 15. April.2015 _____ Signature: _____ 何海荣

Approved by (english name): _____ Dicky Du

- C. Function description
- D. Communication objects

A.

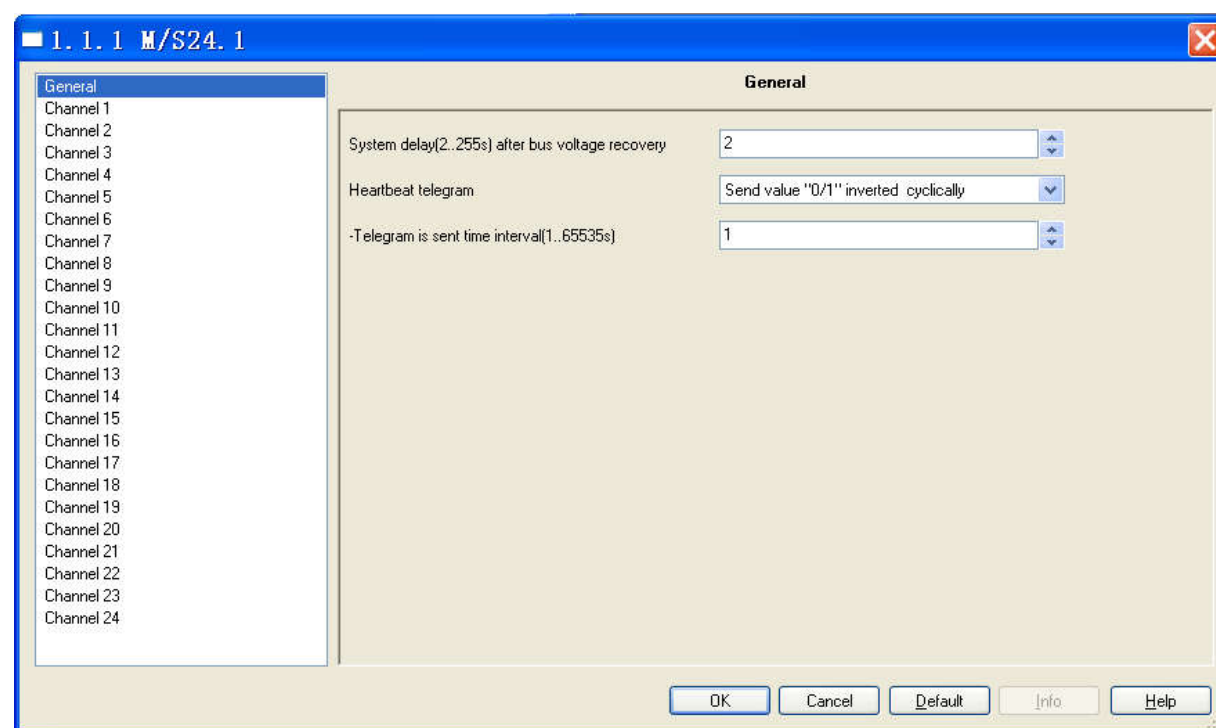

The Dry Contact 24CH Sensor is used to operate building functions. This manual contains the programming of this device.

B.

C.

1.0_General

No.	ETS-Parameter	Range (default)	Description
1	System delay(2...255s) after bus voltage recovery	(2)...255S	Set the delay time for the device after power on, the range is 2~255s
2	Heartbeat telegram	(Disable) Send value '0' cyclically Send value '1' cyclically Send value '0/1' inverted cyclically	If the value is set '0', send '0', the device will send telegram cyclically; If the value is set '1', send '1', the device will send telegram cyclically; If the value is set '0/1', the device will send telegram(alternately between 0 and 1)cyclically. If set disable, the heart telegram is invalid.
3	Telegram is sent time interval(1..65535s)	(1)...65535s	Set the parameter, the device will send the telegram cyclically after time out.

2.0_Channel 1-24 setting (all channels setting is same), Input 1 detection

No.	ETS-Parameter	Range (default)	Description
4	Input 1 detection	-(No detection) -Dry contact sensor	Functions selection
2.1_Dry contact sensor			
5	Enable/Disable via bus	(Disable), Enable	If select 'Enable', you can enable/disable the channel 1 via bus
6	Function selection==>	-(Switch controller) -Switch / Dimming controller -Shutter controller -Flexible controller -Scene controller -Sequence controller -Percentage controller -Threshold controller -String (14bytes) controller -Forced position controller -Counter controller -Combination controller	Select the output control function.
2.1.1.1_Switch controller			
7	Dry contact type	-(Mechanical switch) -Electronic switch	Mechanical switch: it has two states, "OFF" and "ON". You can set commands to each state.(act as a bi-stable button) Electronic Switch: act as a mono-stable button.
2.1.1.1.1_Mechanical switch			
8	Reaction when closing the contact	-Unchanged -(ON)	Unchanged: It will send the same value as the last time.

		-OFF -Toggle -Stop cyclic telegram	ON: The value it will send is 1. OFF: The value it will send is 0. Toggle: It will invert the last time's value then send it out. Stop cyclic telegram: This is mainly used for the following cycle settings.
9	Reaction when opening the contact	-Unchanged -ON -(OFF) -Toggle -Stop cyclic telegram	Unchanged: It will send the same value as the last time. ON: The value it will send is 1. OFF: The value it will send is 0. Toggle: It will invert the last time's value then send it out. Stop cyclic telegram: This is mainly used for the following cycle settings.
10	Delay for ON of switch(0..255s)	(0)...255	Set the delay time for switch on
11	Delay for OFF of switch(0..255s)	(0)...255	Set the delay time for switch off
12	Object value inverted when receiving from bus	-(NO) -YES	NO: It will not invert the receiving value YES: It will invert the receiving value
13	Cyclic telegram of object	-(NO) -if switch is "ON" -if switch is "OFF" -Always transmission	NO: There is not cyclic function. If switch is ON: It will send out the telegram cyclically when the switch is on. If switch is OFF: It will send out the telegram cyclically when the switch is off. Always transmission: No matter the switch is on or off, it will send out the telegram cyclically.
14	Transmit object value after bus voltage recovery	-NO -(YES)	Whether transmit object value after bus voltage recovery.
15	The operation time interval: base	-(10ms) -100ms -1sec -1min -1hour	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
16	Factor[1..255]->time=base*factor	(1)...255	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
2.1.1.1.2 Electronic switch			
17	The normally contact status is	-Closed -(Open)	Set the dry contact's normal status when have no

			<i>operation.</i> Closed: The dry contact's normal status is closed. Open: The dry contact's normal status is open
18	Reaction when short button operation	-Invalid -Unchanged -ON -OFF -(Toggle)	Set the output control type when short press the button
19	Reaction when long button operation	-(Invalid) -Unchanged -ON -OFF -Toggle	Set the output control type when long press the button
20	Long button time after	0.2s...(1s)...60s	Set the long press time
21	Delay for ON of switch(0..255s)	(0)...255	Set the delay time for switch on
22	Delay for OFF of switch(0..255s)	(0)...255	Set the delay time for switch off
23	Object value of short button inverted when receive from bus	-(NO) -YES	NO: It will not invert the receiving value YES: It will invert the receiving value
24	Object value of long button inverted when receive from bus	-(NO) -YES	NO: It will not invert the receiving value YES: It will invert the receiving value
25	The operation time interval: base	-(10ms) -100ms -1sec -1min -1hour	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
26	Factor[1..255]->time=base*factor	(1)...255	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.

2.1.1.2_Switch/Dimming controller

The screenshot shows the '1. 1. 1 M/S24.1' configuration window. On the left is a list of channels from 1 to 24. The 'Channel 1' tab is selected. The main area is titled 'Channel 1' and contains the following settings:

- Input 1 detection: Dry contact sensor
- 'Enable/Disable' via bus: Enable
- Function selection ==>: Switch/Dimming controller
- Dry contact type: Mechanical switch
- Reaction when closing the contact: Dim->Brighter/Darker
- Reaction when opening the contact: Dim->Stop
- Dimming steps(Brightness changed on every sent telegram): Step1 (100%)
- Dimming telegram repeat enabled(valid only when dimming up/down): Disable
- Transmit object value after bus voltage recovery: No
- The operation time interval base: 10ms
- Factor[1..255]->time=base*factor: 1

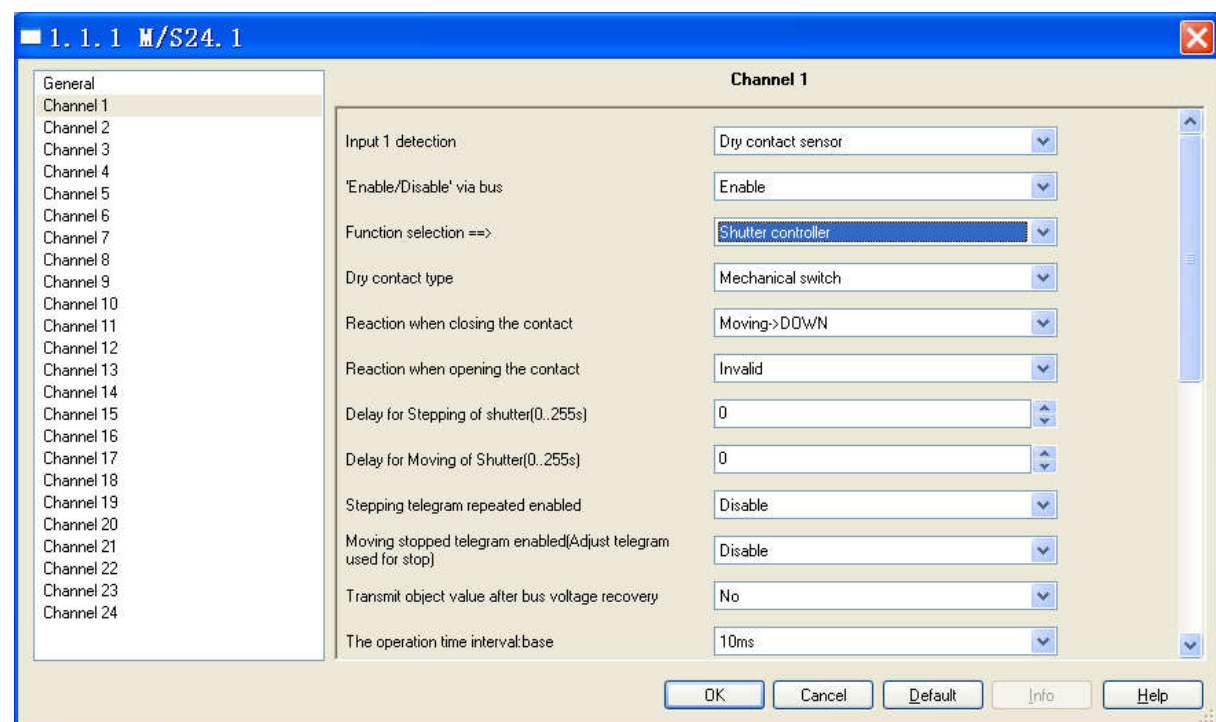

At the bottom are buttons for OK, Cancel, Default, Info, and Help.

No.	ETS-Parameter	Range (default)	Description
27	Dry contact type	-(Mechanical switch) -Electronic switch	Function selection
2.1.1.2.1 Mechanical switch			
28	Reaction when closing the contact	-Invalid -Dim->Brighter -Dim->Darker -(Dim-> Brighter/Darker) -Dim-> Stop	Invalid: no action when closing the dry contact. Dim->Brighter: When closing the dry contact, it will increase the brightness. Dim->Darker: When closing the dry contact, it will decrease the brightness. Dim-> Brighter/Darker: When closing the dry contact, it will increase/decrease the brightness. If at the first time, it increases the brightness, next time, it will decrease the brightness Dim->Stop: when closing the dry contact, it will stop dimming.
29	Reaction when opening the contact	-Invalid -Dim->Brighter -Dim->Darker -Dim-> Brighter/Darker -(Dim-> Stop)	Invalid: no action when closing the dry contact. Dim->Brighter: When closing the dry contact, it will increase the brightness. Dim->Darker: When closing the dry contact, it will decrease the brightness.

			Dim-> Brighter/Darker: When closing the dry contact, it will increase/decrease the brightness. If at the first time, it increases the brightness, next time, it will decrease the brightness Dim->Stop: when closing the dry contact, it will stop dimming.
30	Dimming steps (Brightness changed on every sent telegram)	-(Step1 (100%)) -Step2 (50%) -Step3 (25%) -Step4 (12.5%) -Step5 (6.25%) -Step6 (3.13%) -Step7 (1.56%)	Set the dimming value when send out the telegram
31	Dimming telegram repeat enabled (valid only when dimming up/down)	-(Disable) -Enable	Whether repeat sending dimming telegram. Disable: do not repeat sending dimming telegram. Enable: when dimming up/down will repeat sending dimming telegram.
32	Dimming telegram repeated time	0.2s...(0.4s)...60s	Set the repeat time
33	Dimming telegram repeated number (1-255,0-unlimited)	(0)...255	The repeat time of the dimming telegram
34	Transmit object value after bus voltage recovery	-(NO) -YES	Whether transmit object value after bus voltage recovery.
35	The operation time interval: base	(10ms)...1hour	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
36	Factor[1..255]- >time=base*factor	(1)...255	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
2.1.1.2.2 Electronic switch			
37	The normally contact status is	-Closed -(Open)	Set the dry contact's normal status when have no operation. Closed: The dry contact's normal status is closed. Open: The dry contact's normal status is open
38	Reaction when short button operation	-Invalid -Unchanged -ON -OFF -(Toggle)	Set the output control type when short press the button
39	Reaction when long button operation	-Invalid -Dim->Brighter -Dim->Darker -(Dim-> Brighter/Darker)	Set the output control type when long press the button
40	Long button time after	0.2s...(1s)..60s	Set the time for long press
41	Delay for ON of switch(0..255s)	(0)..255	Set the delay time for ON of

			<i>switch.</i>
42	Delay for OFF of switch(0..255s)	(0)..255	<i>Set the delay time for OFF of switch.</i>
43	Dimming steps (Brightness changed on every sent telegram)	-Step1 (100%) -Step2 (50%) -Step3 (25%) -Step4 (12.5%) -Step5 (6.25%) -Step6 (3.13%) -Step7 (1.56%)	<i>Set the dimming value when send the out the telegram</i>
44	Dimming telegram repeated enable	(Disable) Enable	<i>Whether repeat sending the dimming telegram</i>
45	Dimming telegram repeated time	0.2s..(0.3s)..60s	<i>Set the repeat time</i>
46	Dimming telegram repeated number (1..255,0-unlimited)	(0)..255	<i>The repeat time for the dimming telegram</i>
47	The operation time interval: base	(10ms)..1hour	<i>These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.</i>
48	Factor[1..255]- >time=base*factor	(1)...255	<i>These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.</i>

2.1.1.3_Shutter controller

The screenshot shows the 'Channel 1' configuration window for the M/S24.1 sensor. The 'Function selection ==>' is set to 'Shutter controller'. Other settings include: Input 1 detection (Dry contact sensor), 'Enable/Disable' via bus (Enable), Dry contact type (Mechanical switch), Reaction when closing the contact (Moving->DOWN), Reaction when opening the contact (Invalid), Delay for Stepping of shutter (0), Delay for Moving of Shutter (0), Stepping telegram repeated enabled (Disable), Moving stopped telegram enabled (Adjust telegram used for stop) (Disable), Transmit object value after bus voltage recovery (No), and The operation time interval base (10ms).

No.	ETS-Parameter	Range (default)	Description
49	Dry contact type	-(Mechanical switch) -Electronic switch	Function selection
2.1.1.3.1_Mechanical switch			
50	Reaction when closing the contact	-Invalid -Stepping->Increase -Stepping->Decrease -Stepping->Toggle -Stepping->Repeat telegram stopped -Moving->UP -(Moving->DOWN) -Moving->Toggle	<p>Invalid: no action when closing the contact</p> <p>Stepping->Increase: when closing dry contact, it will increase the angle of shutter</p> <p>Stepping-> Decrease: when closing dry contact, it will decrease the angle of shutter</p> <p>Stepping-> Toggle: when closing dry contact, it will increase/decrease the angle of shutter.</p> <p>Stepping->Repeat telegram stopped: when closing dry contact, it will stop repeating sending the telegram.</p> <p>Moving-> UP: when closing dry contact, it will send move up telegram, the position will be up.</p> <p>Moving-> Down: when closing dry contact, it will send move down telegram, the position will be down.</p>

			Moving-> Toggle: when closing dry contact, it will send move up/down telegram, the position will be up/ down.
51	Reaction when opening the contact	-(Invalid) -Stepping->Increase -Stepping->Decrease -Stepping->Toggle -Stepping->Repeat telegram stopped -Moving->UP -(Moving->DOWN) -Moving->Toggle	Invalid: no action when opening the contact Stepping->Increase: when opening dry contact, it will increase the angle of shutter Stepping-> Decrease: when opening dry contact, it will decrease the angle of shutter Stepping-> Toggle: when opening dry contact, it will increase/decrease the angle of shutter. Stepping->Repeat telegram stopped: when opening dry contact, it will stop repeat sending the telegram. Moving-> UP: when opening dry contact, it will send move up telegram, the position will be up. Moving-> Down: when opening dry contact, it will send move down telegram, the position will be down. Moving-> Toggle: when opening dry contact, it will send move up/down telegram, the position will be up/ down.
52	Delay for Stepping of Shutter(0..255s)	(0)...255s	Set the delay time for adjusting the angle of the shutter
53	Delay for Moving of Shutter(0..255s)	(0)...255s	Set the delay time for moving the position of the shutter
54	Stepping telegram repeated enabled	-(Disable) -Enable	Whether repeat sending telegram for adjusting the angle Disable: do not send telegram for adjusting the angle Enable: send telegram for adjusting the angle
55	Stepping telegram repeated time	(0.2s)..60s	The interval of sending adjusting telegram
56	Stepping telegram repeated number (1...255, 0-unlimited)	(0)..255	The repeat times of sending dimming telegram
57	Moving stopped telegram enabled(Adjust telegram used for stop)	-(Disable) -Enable	Enable/disable the function to auto stop the shutter after moving
58	Transmit object value after bus voltage recovery	-(NO) -YES	Whether transmit object value after bus voltage recovery. NO: do not transmit object value after bus voltage recovery.

			YES: it will transmit object value after bus voltage recovery.
59	The operation time interval: base	(10ms)...1hour	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
60	Factor[1..255]- >time=base*factor	(1)...255	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
2.1.1.3.2 Electronic switch			
61	The normally contact status is	-Closed -(Open)	Set the dry contact normal status when has no operation. Close: the contact's normal status is closed. Open: the contact's normal status is open.
62	Reaction when short button operation	-Invalid -(Stepping->Increase/STOP) -Stepping->Decrease/STOP -Stepping->Toggle/STOP -Moving->UP -Moving->DOWN -Moving->Toggle	Invalid: no action when short press Stepping->Increase/Stop: when short press the button, it will increase/stop adjusting the angle of shutter Stepping-> Decrease/Stop: when short press the button, it will decrease/ stop adjusting the angle of shutter Stepping-> Toggle/Stop: when short press the button, it will toggle/ stop adjusting the angle of shutter Moving-> UP: when short press the button, it will it will send move up telegram, the position will be up. Moving-> Down: when short press the button, it will it will send move up telegram, the position will be up. Moving-> Toggle: when short press the button, it will send move up/down telegram, the position will be up/ down.
63	Reaction when long button operation	-Invalid -Stepping->Increase/STOP -Stepping->Decrease/STOP -Stepping->Toggle/STOP -Moving->UP -Moving->DOWN -(Moving->Toggle) -Press: Moving->UP, Release: Call short button -Press: Moving->DOWN, Release: Call short button	Invalid: no action when long press the button Stepping->Increase/Stop: when long press the button, it will increase/stop adjusting the angle of shutter Stepping-> Decrease/Stop: when long press the button, it will decrease/stop adjusting the angle of shutter Stepping-> Toggle/Stop:

		-Press: Moving->Toggle, Release: Call short button	<p>when long press the button, it will toggle/ stop adjusting the angle of shutter</p> <p>Moving-> UP: when long press the button, it will send move up telegram, the position will be up.</p> <p>Moving-> Down: when long press the button, it will it will send move up telegram, the position will be down.</p> <p>Moving-> Toggle: when long press the button, it will send move up/down telegram, the position will be up/ down.</p> <p>Press: Moving->UP, Release: Call short button: When long press the button, it will send move up telegram, when release, it will send telegram of short press.</p> <p>Press: Moving->DOWN, Release: When long press the button, it will send move down telegram, when release, it will send telegram of short press.</p> <p>Press: Moving->Toggle, Release: Call short button: When long press the button, it will send move up/down telegram, when release, it will send telegram of short press</p>
64	Long button time after	0.2s...(1s)...60s	Set the time for long press
65	Delay for Stepping of shutter(0..255s)	(0)...255s	Set the delay time for adjusting the angle of shutter
66	Delay for Moving of shutter(0..255s)	(0)...255s	Set the delay time for Moving the position of shutter.
67	Stepping telegram repeated enable	(Disable), Enable	<p>Whether repeat sending adjusting telegram.</p> <p>Disable: do not repeat sending adjusting telegram.</p> <p>Enable: it will repeat sending the adjusting telegram.</p>
68	Stepping telegram repeated time	0.2s...(0.3s)...60s	The interval of sending adjusting telegram
69	Moving stopped telegram enabled (Adjust telegram used for stop)	(Disable), Enable	Enable/disable the function to auto stop the shutter after moving
70	Moving stopped telegram delay time: base	100ms...1sec..1hour	These two parameters are used to set the delay time to stop the shutter after moving, the delay time = base*factor.
71	Factor[1..255]->time=base*factor	1...(10)...255	These two parameters are used to set the delay time to stop the shutter after moving,

			<i>the delay time = base*factor.</i>
72	The operation time interval: base	(10ms)..1hour	<i>These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.</i>
73	Factor[1..255]- >time=base*factor	1..(10)...255	<i>These two parameters are used to set the delay time to stop the shutter after moving, the delay time = base*factor.</i>

2.1.1.4_Flexible controller

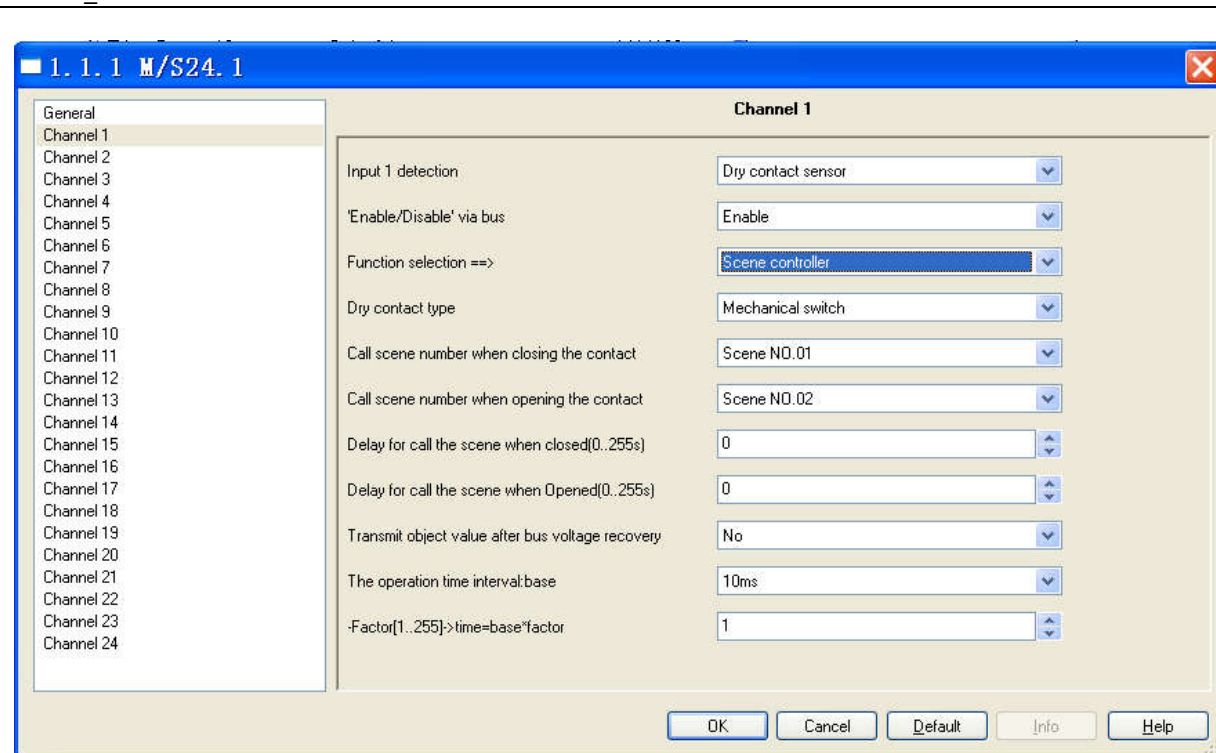

No.	ETS-Parameter	Range (default)	Description
75	Dry contact type	-(Mechanical switch) -Electronic switch	<i>Function selection</i>
2.1.1.4.1_Mechanical switch			
76	Flexible button operation	-Invalid -(Close='toggle') -Open='toggle' -Close='ON' -Open='ON' -Close='ON', Open='ON' -Close='OFF' -Open='OFF' -Close='OFF', Open='OFF' -Close='ON', Open='OFF' -Close='OFF', Open='ON'	<i>Invalid: the dry contact is invalid. Close='toggle': when close, it will invert the last time's value then send it out Open='toggle': When open, it will invert the last time's value then send it out Close='ON': when close, the value will send '1' Open='ON': when open, the value will send '1' Close='ON', Open='ON': the value will always send '1' Close='OFF': when close, the</i>

			<p>value will send '0'</p> <p>Open='OFF': when open, the value will send '0'</p> <p>Close='OFF', Open='OFF': the value will always send '0'</p> <p>Close='ON', Open='OFF': when close, the value will send '1'; when open, the value will send '0'</p> <p>Close='OFF', Open='ON': when close, the value will send '0'; when open, the value will send '1'</p>
77	Transmit object value after bus voltage recovery	-(NO) -YES	<p>Whether transmit object value after bus voltage recovery.</p> <p>NO: do not transmit object value after bus voltage recovery.</p> <p>YES: will transmit object value after bus voltage recovery.</p>
78	The operation time interval: base	(10ms)...1hour	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.
79	Factor[1..255]->time=base*factor	(1)...255	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.
2.1.1.4.2 Electronic switch			
80	The normally contact status is	-Closed -(Open)	<p>Set the dry contact normal status when has no operation.</p> <p>Close: the contact's normal status is closed.</p> <p>Open: the contact's normal status is open.</p>
81	Flexible button operation	Invalid -(Press='toggle') Release='toggle' Press ='ON' Release ='ON' Press ='ON', Release ='ON' Press ='OFF' Release ='OFF' Press ='OFF', Release ='OFF' Press ='ON', Release ='OFF' Press ='OFF', Release ='ON'	<p>Invalid: the dry contact is invalid.</p> <p>Press='Toggle': when press, it will invert the last time's value then send it out</p> <p>Release='Toggle': when release, it will invert the last time's value then send it out</p> <p>Press ='ON': when press, the value will send is 1</p> <p>Release ='ON': when release, the value will send is 1</p> <p>Press='ON', Release ='ON': the value will send is always 1</p> <p>Press='OFF': when press, the value will send is 0</p> <p>Release='OFF': when release, the value will send is 0</p> <p>Press=' OFF', Release='OFF': the value will send is always 0</p> <p>Press='ON', Release='OFF':</p>

			<p>when press, the value will send is 1; when release, the value will send is 0</p> <p>Press='OFF', Release='ON': when press, the value will send is 0; when release, the value will send is 1</p>
82	The operation time interval: base	(10ms)..1hour	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.
83	Factor[1..255]->time=base*factor	(1)...255	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.

243	-External telegram control mode	-Ring start-'1', Ring stop-'0' -Ring start-'0', Ring stop-'1' -Ring start-'0'/'1' -Ring stop- '0'/'1'	Set the external telegram control mode
244	Bell ring after bus voltage recovery	-(No) -Yes	Whether the bell ring after bus voltage recovery No: the bell won't ring after bus voltage recovery Yes: the bell will ring after bus voltage recovery
245	The operation time interval: base	-(10ms) -100ms -1sec -1min -1hour	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.
246	Factor[1..255]->time=base*factor	(1)...255	These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.
2.1.1.12.2 Electronic switch			
247	The normally contact status is	-Closed -(Open)	Set the dry contact normally status when has no operation. Close: the contact status is closed. Open: the contact status is open.
248	Reaction when short button operation	-Invalid -(Ring start) -Ring stop -Ring toggle	Set the control type when short press the button
249	Reaction when long button operation	-Invalid -Ring start -(Ring stop) -Ring toggle	Set the control type when long press the button
250	Long button time after	0.2...(1)...60	Set time for long press
251	The bell work mode	-Make a sound continuously -Make a sound brokenly	Set the working mode of the bell
252	-Making a sound telegram value	-(Sound-'1', Mute-'0') -(Sound-'0',Mute-'1')	Send the telegrams to control the sound
253	-Bell ringing keep time(0-unlimited,1...65535s)	1...(10)...65535	Set the time for the bell ringing
254	-Sound duration (1...255s)	(1)...255	Set the time for sound duration
255	-Mute duration (1...255s)	(1)...255	Set the time for mute duration
256	-Ring times (0-unlimited,1...255)	1...(5)...255	Set the ring time
257	Enable external telegram control	-(No) -Yes	Enable/Disable external telegram control No: cannot send the external telegram to control Yes: can send the external telegram to control

258	-External telegram control mode	-Ring start-'1', Ring stop-'0' -Ring start-'0', Ring stop-'1' -Ring start-'0'/'1' -Ring stop- '0'/'1'	<i>Set the external telegram control mode</i>
259	The operation time interval: base	-(10ms) -100ms -1sec -1min -1hour	<i>These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.</i>
260	Factor[1..255]->time=base*factor	(1)...255	<i>These two parameters are setting the time interval of repeat operation dry contact, the time is base*factor.</i>

Input 1 detection: Dry contact sensor

'Enable/Disable' via bus: Enable

Function selection ==>: Combination controller

Dry contact type: Mechanical switch

Delay for send when Closed(0..255s): 0

Delay for send when Opened (0..255s): 0

Transmit object value after bus voltage recovery: No

The operation time interval:base: 100ms

-Factor[1..255]->time=base*factor: 1

Reaction when closing the contact: On closing->

Object type 1 (closing operation): Invalid

Object type 2 (closing operation): Invalid

OK Cancel Default Info Help

No.	ETS-Parameter	Range (default)	Description
261	Dry contact type	-(Mechanical switch) -Electronic switch	Function selection
2.1.1.12.1_Mechanical switch			
262	Delay for send when Closed (0..255s)	(0)..255	Set the delay time to send telegram when closing
263	Delay for send when Opened (0..255s)	(0)..255	Set the delay time to send telegram when opening
264	Transmit object value after bus voltage recovery	-(NO) -YES	Whether transmit object value after bus voltage recovery. NO: do not transmit object value after bus voltage recovery. YES: will transmit object value after bus voltage recovery.
265	The operation time interval: base	10ms..(100ms)..1hour	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
266	Factor[1..255]->time=base*factor	(1)...255	These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.
267	Object type 1-10 (closing operation)	-(Invalid) -Switch controller -Shutter controller -Scene controller -Sequence controller -Percentage controller -Threshold controller -String (14bytes) controller	it can send several control telegrams simultaneously when closing. Set the control objects' type here

268	-Switch value	-Toggle -(ON) -OFF	Toggle: It will invert the last time's value then send it out. ON: The value it will send is 1. OFF: The value it will send is 0.
269	-Shutter value	-Toggle -(UP) -DOWN	Toggle: it will send move up/down telegram UP: it will send move up telegram Down: it will send move down telegram
270	-Scene value	-(Scene NO.01)..Scene NO.64	Set the output scene number
271	-Scene toggled	-(NO) -YES	Enable/disable the toggle function for scene control
272	-Toggled scene NO. is	-Scene NO.01..(Scene NO.02)..Scene NO.64	Set another output scene number, toggle between two of them to send out
273	-Sequence value	-Toggle -(Start) -Stop	Toggle: It will invert the last time's value then send it out Start with "1": The value it will send is 1 to start the sequence. Stop with "0": The value it will send is 0 to stop the sequence.
274	-Percentage value	0%(0)..(100%(255))	Set the output percentage value
275	-Brightness toggled	-(NO) -YES	Enable/disable the toggle function for percentage control
276	-Toggled brightness is	(0%(0))..100%(255)	Set another output percentage value, toggle between two of them to send out
277	-Threshold value type	-(1byte threshold) -2bytes threshold	Set the threshold control type
278	-Threshold (0..255) value	0..(255)	Set the threshold value
279	-Threshold(065535) value	0..(1000)..65535	Set the threshold value
280	-Threshold toggled	-(NO) -YES	Enable/disable the toggle function for threshold control
281	-Toggled threshold (0..255) is	0..(255)	Set another output threshold value, toggle between two of them to send out
282	-String (14bytes) value	(Hello world!)	Set the output string content
283	Object type 1-10 (opening operation)	-(Invalid) -Switch controller -Shutter controller -Scene controller -Sequence controller -Percentage controller -Threshold controller -String (14bytes) controller	it can send several control telegrams simultaneously when opening. Set the control objects' type here
284	-Switch value	-Toggle -(ON) -OFF	Toggle: It will invert the last time's value then send it out. ON: The value it will send is 1.

			OFF: The value it will send is 0.
285	-Shutter value	-Toggle -(UP) -DOWN	Toggle: it will send move up/down telegram UP: it will send move up telegram Down: it will send move down telegram
289	-Scene value	-(Scene NO.01)..Scene NO.64	Set the output scene number
290	-Scene toggled	-(NO) -YES	Enable/disable the toggle function for scene control
291	-Toggled scene NO. is	-Scene NO.01..(Scene NO.02)..Scene NO.64	Set another output scene number, toggle between two of them to send out
292	-Sequence value	-Toggle -(Start) -Stop	Toggle: It will invert the last time's value then send it out Start with "1": The value it will send is 1 to start the sequence. Stop with "0": The value it will send is 0 to stop the sequence.
293	-Percentage value	0%(0)..(100%(255))	Set the output percentage value
294	-Brightness toggled	-(NO) -YES	Enable/disable the toggle function for percentage control
295	-Toggled brightness is	(0%(0))..100%(255)	Set another output percentage value, toggle between two of them to send out
296	-Threshold value type	-(1byte threshold) -2bytes threshold	Set the threshold control type
297	-Threshold (0..255) value	0..(255)	Set the threshold value
298	-Threshold(065535) value	0..(1000)..65535	Set the threshold value
299	-Threshold toggled	-(NO) -YES	Enable/disable the toggle function for threshold control
300	-Toggled threshold (0..255) is	0..(255)	Set another output threshold value, toggle between two of them to send out
301	-String (14bytes) value	(Hello world!)	Set the output string content
2.1.1.12.2_Electronic switch			
302	The normally contact status is	Closed/(Open)	Set the dry contact's normal status when have no operation. Close: the contact's normal status is closed. Open: the contact's normal status is open.
303	Long button time after	0.2s..(1s)..60s	Set time for long-press, define the long press by end-user
304	Delay for short operation (0..255s)	(0)..255	Set the delay time to send out telegram for short press
305	Delay for long operation (0..255s)	(0)..255	Set the delay time to send out telegram for long press

306	The operation time interval: base	10ms..(100ms)..1hour	<i>These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.</i>
307	Factor[1..255]- >time=base*factor	(1)...255	<i>These two parameters are used to set the time interval of repeat operation, the time interval = base*factor.</i>
308	Object type 1-10 (short operation)	- (Invalid) - Switch controller - Shutter controller - Scene controller - Sequence controller - Percentage controller - Threshold controller - String (14bytes) controller	<i>it can send several control telegrams simultaneously when short press. Set the control objects' type here</i>
309	-Switch value	-Toggle -(ON) -OFF	Toggle: It will invert the last time's value then send it out. ON: The value it will send is 1. OFF: The value it will send is 0.
310	-Shutter value	-Toggle -(UP) -DOWN	Toggle: it will send move up/down telegram UP: it will send move up telegram Down: it will send move down telegram
311	-Scene value	-(Scene NO.01)..Scene NO.64	<i>Set the output scene number</i>
312	-Scene toggled	-(NO) -YES	<i>Enable/disable the toggle function for scene control</i>
313	-Toggled scene NO. is	-Scene NO.01..(Scene NO.02)..Scene NO.64	<i>Set another output scene number, toggle between two of them to send out</i>
314	-Sequence value	-Toggle -(Start) -Stop	Toggle: It will invert the last time's value then send it out Start with "1": The value it will send is 1 to start the sequence. Stop with "0": The value it will send is 0 to stop the sequence.
315	-Percentage value	0%(0)..(100%(255))	<i>Set the output percentage value</i>
316	-Brightness toggled	-(NO) -YES	<i>Enable/disable the toggle function for percentage control</i>
317	-Toggled brightness is	(0%(0))..100%(255)	<i>Set another output percentage value, toggle between two of them to send out</i>
318	-Threshold value type	-(1byte threshold) -2bytes threshold	<i>Set the threshold control type</i>
319	-Threshold (0..255) value	0..(255)	<i>Set the threshold value</i>

320	-Threshold(065535) value	0..(1000)..65535	Set the threshold value
321	-Threshold toggled	-(NO) -YES	Enable/disable the toggle function for threshold control
322	-Toggled threshold (0..255) is	0..(255)	Set another output threshold value, toggle between two of them to send out
323	-String (14bytes) value	(Hello world!)	Set the output string content
324	Object type 1-10 (long operation)	-(Invalid) -Switch controller -Shutter controller -Scene controller -Sequence controller -Percentage controller -Threshold controller -String (14bytes) controller	it can send several control telegrams simultaneously when long press. Set the control objects' type here
325	-Switch value	-Toggle -(ON) -OFF	Toggle: It will invert the last time's value then send it out. ON: The value it will send is 1. OFF: The value it will send is 0.
326	-Shutter value	-Toggle -(UP) -DOWN	Toggle: it will send move up/down telegram UP: it will send move up telegram Down: it will send move down telegram
327	-Scene value	-(Scene NO.01)..Scene NO.64	Set the output scene number
328	-Scene toggled	-(NO) -YES	Enable/disable the toggle function for scene control
329	-Toggled scene NO. is	-Scene NO.01..(Scene NO.02)..Scene NO.64	Set another output scene number, toggle between two of them to send out
330	-Sequence value	-Toggle -(Start) -Stop	Toggle: It will invert the last time's value then send it out Start with "1": The value it will send is 1 to start the sequence. Stop with "0": The value it will send is 0 to stop the sequence.
331	-Percentage value	0%(0)..(100%(255))	Set the output percentage value
332	-Brightness toggled	-(NO) -YES	Enable/disable the toggle function for percentage control
333	-Toggled brightness is	(0%(0))..100%(255)	Set another output percentage value, toggle between two of them to send out
334	-Threshold value type	-(1byte threshold) -2bytes threshold	Set the threshold control type
335	-Threshold (0..255) value	0..(255)	Set the threshold value
336	-Threshold(065535) value	0..(1000)..65535	Set the threshold value
337	-Threshold toggled	-(NO) -YES	Enable/disable the toggle function for threshold control
338	-Toggled threshold (0..255) is	0..(255)	Set another output threshold

			<i>value, toggle between two of them to send out</i>
339	-String (14bytes) value	(Hello world!)	<i>Set the output string content</i>

XX

D. Communication Objects ('Electronic switch' adjustment)

D. 0 General

Objects 'General' and Enable 'Heartbeat telegram'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"			1 bit	C	-	-	T	-		Low
1	General	Heartbeat telegram send "1"			1 bit	C	R	W	T	U		Low
2	General	Heartbeat telegram send "0" and "1"			1 bit	C	R	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
0	General	Heartbeat telegram send '0'	C T	DPT 1.003 1bit
This communication object is 'Heartbeat telegram'. When set '0', will send the telegram value '0' cyclically				
1	General	Heartbeat telegram send '1'	C R W T U	DPT 1.003 1bit
This communication object is 'Heartbeat telegram'. When set '1', will send the telegram value '1' cyclically				
2	General	Heartbeat telegram send'0' and '1'	C R W T U	DPT1.003 1bit
This communication object is 'Heartbeat telegram'. When set '0/1', will send the telegram (alternately between 0 and 1) cyclically.				

D. 1 Dry contact sensor

Objects 'Switch controller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"			1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	Switching			1 bit	C	-	W	T	U		Low
12	Input 1 (long)	Switching			1 bit	C	-	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
10	Input 1	'1' -Enable/'0'-Disable	C W	DPT 1.003 1bit

This communication object is enable/disable for Input 1. When it receives telegram '1', the Input 1 function is enable; when it receives telegram '0', the Input 1 function is disable.

11	Input 1(short)	Switching	C W T U	DPT 1.001 1bit
12	Input 1(long)	Switching	C W T U	DPT1.001 1bit

These communication objects are switch controller, when short /long press the Input 1, will send telegram to control switch

Objects 'Switch/Dimmingcontroller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
12	Input 1	Dimming			4 bit	C	-	-	T	-		Low

NO.	Objectname	Function	Flags	Data type
12	Input 1	Dimming	C W	DPT 3.007 4 bit

This communication object is dimming control, when you control Input 1, will send the telegram to control dimming.

Objects 'shuttercontroller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		
11	Input 1 (short)	Adjust for shutter(Inc)			1 bit	C	-	W	T	U		
12	Input 1 (long)	Move for shutter(Toggle)			1 bit	C	-	W	T	U		

NO.	Objectname	Function	Flags	Data type
11	Input 1(short)	Adjust forshutter(Inc)	C W T U	DPT 1.007 1 bit
12	Input 1(long)	Move forshutter(Toggle)	C W T U	DPT 1.008 1 bit

These communication objects are shutter control, when you short/long press Input1, will send the telegram to control shutter.

Objects 'Flexible controller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1	Flexible			1 bit	C	-	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1	Flexible	C W T U	DPT 1.001 1 bit

This communication object is flexible control, when you control input 1, will send telegram and then, can be flexible control.

Objects 'Scene controller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	Call scene			1 Byte	C	-	W	T	U		Low
12	Input 1 (long)	Scene dimming			4 bit	C	-	-	T	-		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1(short)	Call scene	C W T U	DPT 18.001 1 byte
12	Input 1(long)	Scene dimming	C T	DPT 3.007 4 bit

These communication objects are scene control, when you short/ long press the Input 1, will send telegram to call scene or scene dimming.

Objects 'Sequencecontroller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	Sequence			1 bit	C	-	W	T	U		Low
12	Input 1 (long)	Sequence			1 bit	C	-	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1(short)	Sequence	C W T U	DPT 1.010 1 bit
12	Input 1(long)	Sequence		

These communication objects are sequence control, when short/long press Input 1, will sends the telegram to control sequence.

Objects 'Percentagecontroller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	Sequence			1 bit	C	-	W	T	U		Low
12	Input 1 (long)	Sequence			1 bit	C	-	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1(short)	Percentage	C W T U	DPT 5.001
12	Input 1(long)	percentage		1 byte

These communication objects are percentage control, when short/long press Input 1, will send telegram to control percentage.

Objects 'Threshold controller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	Threshold(1byte)			1 Byte	C	-	W	T	U		Low
12	Input 1 (long)	Threshold(1byte)			1 Byte	C	-	W	T	U		Low

NO.	Object name	Function	Flags	Data type
11	Input 1(short)	Threshold (1byte)	C W T U	DPT 5.004 1byte
12	Input 1(long)	Threshold (1byte)	C W T U	DPT 5.004 1 byte

These communication objects are threshold, when short/ long press input 1, will send telegram to control threshold.

Objects 'String (14bytes) controller'										
---------------------------------------	--	--	--	--	--	--	--	--	--	--

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1	String(14bytes) value			14 Byte	C	-	-	T	-		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1(short)	String(14 bytes)value	C T	DPT 16.000 2 bytes

These communication objects are string control, when short/long press input 1, will send telegram to control the string value

Objects 'Forcedpositioncontroller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (closed)	Forced value(2bits)			2 bit	C	-	W	T	U		Low
12	Input 1 (opened)	Forced value(2bits)			2 bit	C	-	W	T	U		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1(closed)	Forced value (2bits)	C W T U	DPT 2.001 2bit
12	Input 1(opened)	Forced value (2bits)	C W T U	DPT 2.001 1 bit

These communication objects are forced control, when opened / closed input 1, will send telegram to control the forced value.

Objects 'counter controller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1	Counter(0..255)			1 Byte	C	-	W	T	U		Low
12	Input 1	Set counter end(0..255)			1 Byte	C	-	W	-	U		Low
13	Input 1	Set counter(0..255)			1 Byte	C	-	W	-	U		Low

NO.	Objectname	Function	Flags	Data type
11	Input 1	Counter (0...255)	C W T U	DPT 5.004 1 byte
12	Input 1	Set counter end(0...255)	C W U	DPT 5.004 1 byte
13	Input 1	Set counter (0...255)	C W U	DPT 5.004 1 byte

These communication objects are counter control, set the value, will start the counter function. And control the No.12 to set the end of the counter and control No.13 to set the counter

Objects 'Bell controller'												
Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1	'1'-Sound/'0'-Mute			1 bit	C	-	-	T	-		Low
12	Input 1	'0/1'-Ring start			1 bit	C	-	W	-	-		Low

NO.	Objectname	Function	Flags	Data type
-----	------------	----------	-------	-----------

11	Input 1	'1'-Sound/'0'-Mute	C T	DPT 1.001 1 byte
12	Input 1	'0/1'-Ring start	C W	DPT 1.010 1 byte

These communication objects are bell control, when send telegram value, can control the bell, such as, send '1' the bell will sound; send '0' the bell will mute; send '0/1', the ring will start.

Objects 'Combination controller'

Number	Name	Object Function	Description	Group Addresses	Length	C	R	W	T	U	Data Type	Priority
0	General	Heartbeat telegram send "0"		1/1/1	1 bit	C	-	-	T	-		Low
10	Input 1	'1'-Enable/'0'-Disable			1 bit	C	-	W	-	-		Low
11	Input 1 (short)	COMB OBJ1 switching			1 bit	C	-	-	T	-		Low
12	Input 1 (short)	COMB OBJ2 shutter			1 bit	C	-	-	T	-		Low
13	Input 1 (short)	COMB OBJ3 scene			1 Byte	C	-	-	T	-		Low
14	Input 1 (short)	COMB OBJ4 sequence			1 bit	C	-	-	T	-		Low
15	Input 1 (long)	COMB OBJ1 switching			1 bit	C	-	-	T	-		Low
16	Input 1 (long)	COMB OBJ2 shutter			1 bit	C	-	-	T	-		Low
